In the mid-twentieth century, American Catholic churches began to shed the ubiquitous spires, stained glass, and gargoyles of their European forebears, turning instead toward startling and more angular structures of steel, plate glass, and concrete. "American Catholics and the Church of Tomorrow shows how by the mid-twentieth century, certain aspects of modernity began to affect the tradition-bound Catholic Church. In the mid-twentieth century, American Catholic churches began to shed the ubiquitous spires, stained glass, and gargoyles of their European forebears, turning instead toward startling and more angular structures of steel, plate glass, and concrete. But how did an institution like the Catholic Church stop building churches that looked back to the middle ages, and began building churches that for the present and the future., American Catholics And The Church Of Tomorrow.
