Moore's law is dead. The future of computing is optical. NLM materials enable the optical future. Thanks for choosing material properties development process. We can develop new type of materials or we can extend life, properties and services of the material, There is vast scope in your subject. The Hall effect occurs only in systems with broken time-reversal symmetry, such as materials under an external magnetic field in the ordinary Hall effect and magnetic materials in the anomalous ... Optics is the branch of physics that studies the behaviour and properties of light, including its interactions with matter and the construction of instruments that use or detect it. Optics usually describes the behaviour of visible, ultraviolet, and infrared light., Nonlinear Optical Properties Of Materials.
