

Download European Dual-use Trade Controls

Dual-use items are goods, software and technology that can be used for both civilian and military applications. The EU controls the export, transit and brokering of dual-use items so the EU can contribute to international peace and security and prevent the proliferation of Weapons of Mass Destruction (WMD). Dual use controls: Regulation granting an EU general export authorisation of certain dual-use items from the EU to the UK. Abstract: This regulation (2019/496) amends Council Regulation (EC) No 428/2009. EU trade policy sets the direction for trade and investment in and out of the EU. The Directorate-General for Trade in the European Commission develops and puts into practice EU trade and investment policy along with the EU's Trade Commissioner. Establishing and implementing effective strategic trade controls are imperative to stopping the proliferation of weapons of mass destruction and conventional weapons. One component of effective strategic trade controls is the adoption of control lists which meet international standards. Control, European Dual-use Trade Controls.
