

Download Lions African Animals

Only male lions boast manes, the impressive fringe of long hair that encircles their heads. Males defend the pride's territory, which may include some 100 square miles of grasslands, scrub, or ...Captive bred lions are killed in canned hunts and slaughtered for the lion bone trade. Join Blood Lions' call to action to end these practices. Living in the grasslands, scrub, and open woodlands of sub-Saharan Africa, the lion is the second largest cat in the world. It is dwarfed slightly by the tiger, which is closely related and has a very similar body type. The lion (*Panthera leo*) is a species in the family Felidae; it is a muscular, deep-chested cat with a short, rounded head, a reduced neck and round ears, and a hairy tuft at the end of its tail., Lions African Animals.
